

CAMILLA

My desire to teach has always stemmed from getting children and teenagers interested in learning. I want to prove to my students and their parents that, simply relying on a textbook is not how education should be carried out, and that the subjects children study can be found in the world around them every day. I make sure that they cover the required syllabus, but also can apply what they learn to wider world discussions and situations; this way learning doesn't become a chore, rather it becomes an integral part of their development.

I am interested in building long term working relationships with each of my students; I believe that level of stability and continuity is key to their success.
